suit

Suit

SUIT , YOUR SECOND BODY

suit

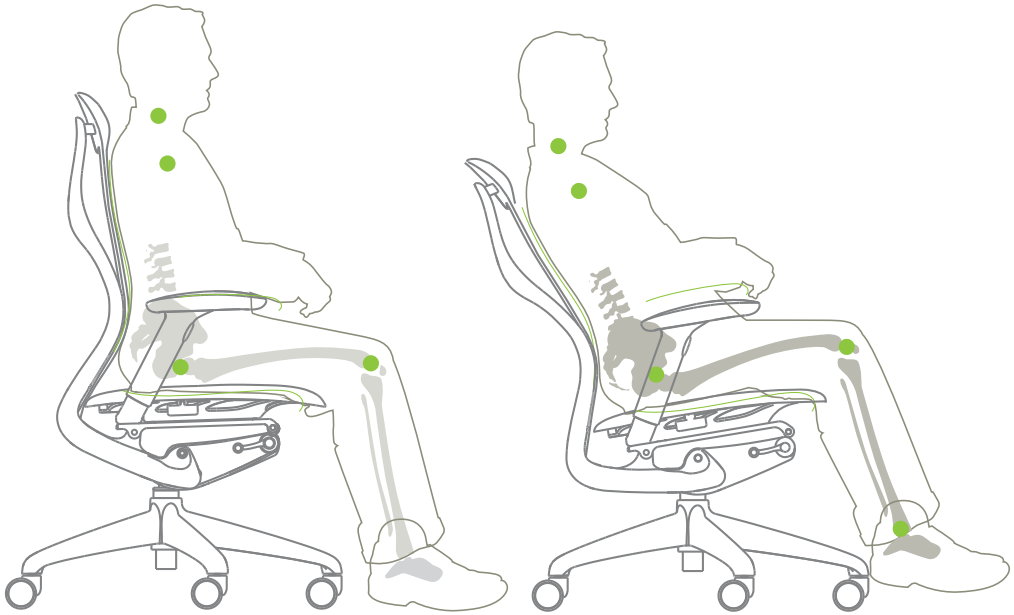
The Suit chair is the ultimate in ergonomic and dynamic design, knowing how to support your body best while at your desk. Every inch of the Suit chair is specially designed to recognise your movements and support your body.

CARES FOR YOUR SPINE

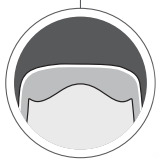
The x-shaped spine protection backrest frame is made with highly elastic nylon. It perfectly matches the curve of your spine, and adapts to your movements, so that your back will always be supported.
The Suit chair supports good postural alignment too.

DYNAMIC ERGONOMIC DESIGN

The Suit chair offers the world's best dynamic ergonomic design solutions.
The DAS mechanism tilts in a wide-range of angles, so that you're supported no matter how you like to sit.

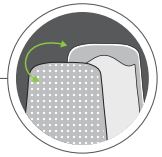


The headrest can be adjusted to suit your preferences with a range of 40mm, which is easily detachable and re-attatched.

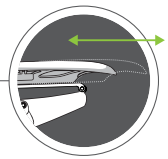


Even the small details are taken care of. That's why each Suit chair also includes specially-designed shoulder cushioning.

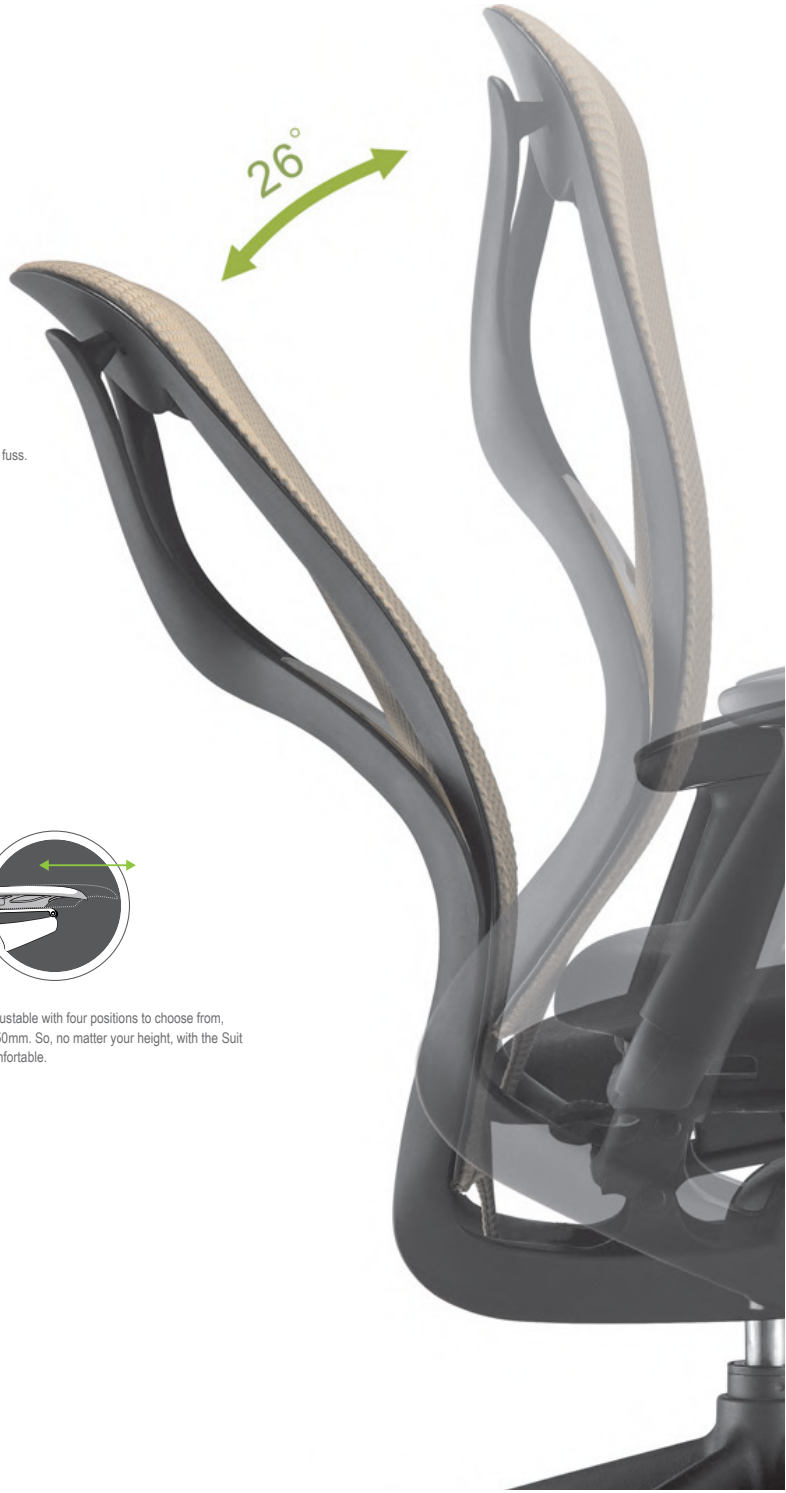
With perfect posture in mind, the lumber support has a range of 65mm and is adjustable, ensuring our back will always be comfortable and supported.



ASIS's patented mesh replacement technology allows the backrest mesh to be replaced without fuss.



The seat depth is adjustable with four positions to choose from, and a total range of 50mm. So, no matter your height, with the Suit your chair will be comfortable.



va + vb = u
