IMAGINE ZERO PRESSURE;
THE ULTIMATE IN COMFORT.

follow

Your body feels weightless in the Follow chair. This chair is designed to adjust to your shape – distributing your weight evenly. The Follow is designed to perfectly support your back and legs, so that even after hours of sitting you won't feel downward pressure or muscle tension and stiffness.

Zero Pressure – S-Curved Backrest

The patented backrest design will ensure your entire body feels supported. You will feel zero pressure, as your body weight is fully supported and your back is cradled.

Helps Prevent Varicose Veins

Sitting for long periods of time can cause discomfort and increase your chance of getting varicose veins. The Follow chair has an innovative cushion that includes an elastic edge that perfectly molds to the curves of your body. This allows the blood to flow freely, while also helping air to circulate allowing your legs to breathe. Follow helps to keep you comfortable.

Comfortable Tilting

Using patented tilting technology, the backrest and cushion automatically adjust to your movements. This feature will ensure maximum comfort as well as the best sitting posture for your back and neck.

Lift and Lock Armrest

The no-button lift and lock armrest allows you to effortlessly adjust your armrest to the most comfortable position. The armrest is made of soft materials, for additional comfort.

"Smart Touch"

A new-generation "smart touch" intelligent tilting system allows you to move up and down, lean back and forth, and lock and unlock with just the touch of one control.
